- Gold or Black Hardware \$75
- Floyd Rose Tremolo \$200
- Wilkinson Tremolo \$200

EMG GUITAR EQ SYSTEMS

EMG SPC "Fat Knob" \$80

A special-design circuit that adds punch and presence to single coil pickups. Also can be used with humbuckers.

EMG RPC \$80

A resonance peak control circuit that boosts the high end peak. Designed for use with single coil pickups. Also can be used with humbuckers.

EMG EXG \$80

A tone expander circuit that boosts the highs and lows and cuts the midrange. This control is especially useful for cleaning up the sound of humbuckers. Can be used with single-coil pickups as well.

•Purpleheart	\$100
•Lacewood	\$100
•Cocobola	\$300
•Multilam Center	\$100
•Purpleheart Center-strip	\$50
•Cocobola fingerboard	\$100

Wood Availability/Selection

We maintain a wide selection of exotic and figured woods. *Very rare woods* are often available. Modulus has a purchasing policy concerning tropical hardwoods. Our goal is to not buy any recently-harvested wood that isn't harvested in a sustained-yield manner. We have already obtained an excellent stock of quality Cocobola.

Bass Specifications

Standard Bass Electronics EMG Pickups

Standard pickups are: 1 EMG P and 1 EMG J in new rectangular housing

•EMG B/T EQ

The EMG B/T-C features a concentric bass/treble control, and the EMG-B/T-S has separate knobs for Bass and Treble. Either one is available.

Bartolini Pickups

Pickups for the Quantum 4 and 5 string are: Custom-wound MBDE triple coil pickup (wired to an "E" switch which chooses between single coil, series humbucking, or parallel humbucking), and one MBCC humbucker.

Pickups for Quantum 6 string basses are: Two P46C 4-coil pickups. These 8-conductor pickups can be switched from series humbucking to traditional and reversed split-coil "P" settings.

TBT has separate Bass and Treble controls

TCT has Bass, Mid, Treble controls

Quantum™ Bass Features

All Quantum Basses have these features:

- Neck Construction Graphite/Epoxy
- Fingerboard Material Phenolic/Ebonol
- Tuning Machines Modulus/Gotoh GB7
- Nut Material Laminated Graphite/Epoxy
- Quantum™ Bass Scale 35"
- Number of Jumbo frets 24

Custom Work

Because Modulus is on the cutting edge of guitar and bass technology, we get many requests for "Custom" instruments. Usually some combination of available options will do, other times it has to be a "Special Order." Please contact your local Modulus Dealer to begin your search. We are happy to help guide you in that journey for the "Ultimate Axe", just call us. *Due to the nature of custom work, delivery times should be longer than for a special order of standard options.* **Deposits on custom work are not refundable.**

Understanding the Modulus Price List

The Guitar and Bass Charts

Here you'll find the prices and features of the most popular models we make. Prices include all the options players have ordered in the past to make it more straightforward. The instruments have been divided into three main classes:

Thru-body series

The Thru-body Blackknife™ guitars listed are special-order only, and you should expect to wait quite a while for one of these instruments.

Quantum™ TBX thru-body basses all come standard with gold hardware, figured maple tops, and active bass and treble. Delivery on these should be expected to be longer than the SPi basses.

Custom series

Standard features of the Blackknife Custom series include: detachable graphite necks, figured maple tops, and gold or black hardware. Delivery times are approximately 8 to 12 weeks.

The Quantum SPi Custom basses represent the most popular class of instrument Modulus makes. Standard features include detachable graphite necks featuring the Integrated Neck Joint™, figured maple tops, black hardware, and active bass and treble. Delivery on these runs 4 to 8 weeks, depending on the backorder situation.

"Standard" Series

These Blackknife guitars feature light alder/poplar bodies, hot paint jobs, and chrome hardware.

The Quantum Spi's also come with alder poplar bodies, solid colors, chrome hardware, and come standard with active bass and treble controls.

Replacement Necks

Modulus has always made its necks available in the traditional styles, but since the bulk of the demand for Modulus product has been for the instruments, please be patient if you order one of these necks.
