

Road 220 & 440 Series

When you've got a Road amp, you've got quality in a lot of different ways. Like superior modular circuit design. The strength of hand-craftsmanship. The precision of automated assembly. Hear's why. Precision, strength, and exclusive modular design. That's the Road difference. And that's why the Road amp is built to take the circuit jarring torture of a road tour. Put it all together and you've got one great amplifier. The Road amp. Built to sound great. Built to last.

Power Pack Features

- Variable compression ratio effect circuit gives 14 dB of sustain along with considerably increased harmonic power output.
- Footswitch controlled input circuit allows noise-free switching between channels.
- 5 Band Graphic Equalizer with 12 dB of boost and cut. Variable-Q gyrator circuit gives high reliability along with low noise.
- 600 ohm line out, for driving another amplifier, mixing direct into a sound system or tape recorder.
- 2 Channels – very low noise.
Normal Input – volume, bass, middle and treble controls.
EQ Effects Input – volume, bass, middle treble, 5 band graphic equalizer, effects and level controls.
Switchable input – for switching between channels.
- Black-anodized heat sink is thermally joined with chassis, thereby utilizing the entire amplifier for heat dissipation. (patent pending).
- Supression circuit that eliminates the loud pop normally heard when amp is turned on or off.
- Massive power supply assures you that all advertised watts will be delivered.
- R.C.A. (2N3773-type) Hometaxial-Base 30 amp power transistors.

220-412 LEAD

412A Speaker Enclosure:

- Special Design 12" Road Speakers
- Infinite Baffle Enclosure
- Impedance: 8 Ohms
- Superb for lead guitar, keyboards and steel guitar
- HWD – 34" x 30" x 16"

440-812 LEAD

Power Output

440 Power Pack into 2.7 ohm Load:
275 watts Sine wave at 1% THD
375 watts RMS Continuous power
with full effects
550 watts Peak power

220 Power Pack into 8 ohm Load:
110 watts Sine wave at 1% THD
160 watts RMS Continuous power
with full effects
220 watts Peak power

Specifications at 1kHz, 120 VAC, 60 Hz Line.

440 & 220 POWER PACK: HWD - 8" x 16" x 14"

220-118 BASS

220-215 BASS

215 Speaker Enclosure

- Special design 15" Road Speakers
- Bass reflex enclosure
- Impedance - 8 Ohms
- Proven Performer for Recording, Club and Concert Dates
- HWD - 44" x 26" x 19"

440-218 BASS

118 A Speaker Enclosures:

- 18" Speakers
- Bass reflex enclosure
- 8 Ohm Cabinets
- The acknowledged standard among professionals
- HWD - 30" x 28" x 19"
