STEP ► UP!™

SPELLBINDER™ BLUE:

Exceptional things do come in small packages! The SWR® Spellbinder™ Blue combo amplifier features the iconic Baby Blue™ tube preamp – long treasured by sound engineers and bassists of all styles for its exceptionally clean, natural tone – housed in a stylish, lightweight Italian poplar cabinet. Power is provided by a 160 watt Class D amplifier with switch mode power supply, which drives a 10" SWR-designed neodymium speaker and Eminence® super-tweeter. The result? A 27 pound (12.25 kg) dynamo that may well be the ultimate in portable, hi-fi tone. The Spellbinder Blue is the perfect amp for studio work and small to medium sized stages, and early prototypes so impressed our old friends Stanley Clarke and Tom Lieber – partners in the Spellbinder brand of "boutique" bass products – that they asked if it could be included in their line! We were more than happy to oblige them and are proud to announce the partnership of SWR and Spellbinder in offering this unique and visionary product. This collaboration is, without a doubt, a match made in bass heaven!
