

RODGERS W6-100U

Front

Back

Weight: 150 lbs.

The W6-100U is an extremely efficient full-range system containing 4 active 15" woofers, an adjustable 10" mid-range speaker, and an adjustable high-frequency driver unit, all powered by the Rodgers S-100 amplifier. There is a High-Bass/Low-Bass switch for the woofers, and a polarity switch for the mid-range and tweeter units, so that proper phasing may be selected for the specific acoustical setting.

The W6-100U cabinet is designed for use in an enclosure or chamber where it will not be visible, and is offered in a brown painted utility finish.
